GAMEPLAY
o--------------------o

There are 64 variations to the game. Choose a Game mode then choose, the book and time.

The secret word is randomly generated and it is up to you to figure out what it is by choosing one letter at a time. If the letter is correct then it will show up in the secret word.

Ex: Let's say that the secret word is BAT or ALABAMA (not actual words in the game) and you chose the letter "A". It will show up as _A_ or A_A_A_A. If the chosen letter is not within the word, a piece of your body is placed around the noose.

If too many letters are guessed incorrectly, then you are hanged but if you are successful in guessing the whole word then you are saved. In all, you have six misses before it's game over.

In 2-player games, the players will alternate turns guessing letters or they can co-operate and either player can guess or move the letter.

The best way to keep track of used letters is that correct letters will show up in the word but incorrect letters will be displayed around the screen.
